

Agentic AI for Life Sciences, built to be trusted

Eight bounded, regulator-aware agents across regulatory, safety, clinical, quality & medical affairs — with a governed platform, an MCP authorization gateway on Amazon Bedrock AgentCore, and one-click AWS deployment.

EIGHT AGENTS

01

Regulatory Writing

Submission sections & responses, grounding-checked

02

Pharmacovigilance

ICSR intake, coding, seriousness, narrative

03

Clinical Trial Ops

TMF completeness, data queries, study health

04

Site & Patient Matching

Eligibility, de-identified cohort, site ranking

05

Quality / CAPA

Complaint triage, root cause, CAPA drafting

06

Protocol Design

Guidance, feasibility, protocol drafting

07

RWE / HEOR

Cohort definition, evidence synthesis

08

Medical Affairs / MSL

Compliant, cited briefs; MLR submission

GOVERNED BY DESIGN

● In-account inference

Bedrock in your AWS account — no PHI/IP egress

● Human-in-the-loop

Every consequential action needs a verified human approval

● Grounded output

Every number & entity traces to source

● MCP authorization gateway

AgentCore Gateway+Identity: deny-by-default, scoped tokens

● Tamper-evident audit

Append-only, e-signature linkage — 21 CFR Part 11

● Validation-ready

Versioned prompts/models, eval harness in CI (GxP/CSV)

HIPAA • 21 CFR Part 11 • GxP (GCP/GLP/GMP) • GVP / ICH E2B(R3) • FDA QMSR • EU AI Act • GDPR

FAST TO VALUE

75%

faster regulatory first draft

~8 hrs

saved per AE case

1-click

CloudFormation deploy

8

agents, 480+ tests

Start with one workflow: pick it → run the assessment (context of use, risk, your ROI baseline) → stand up the AWS demo with governance proven.
